Maximo / ITSM / Analytics Start Kit

- A great solution deployment that doesn't require businesses to start from scratch.
- Quickly get started and work with the system through a relatively simple installation.
- It takes only a couple of days to get going and to get the system up and running.
- A system to grow in – scalable!
 - More building blocks available
 - More functionality available
- When business needs change, the system can be scaled to fit the current needs.
- Includes Sigma best practices for integrations and data preparations
